

plugins for Adobe Acrobat

BCL Computers leads the industry in providing the tools necessary for document management and web publishing. We specialize in developing software solutions that analyze, manipulate and use information that is stored in different file formats. We concentrate a large portion of our research and development efforts in text and speech based Human Computer Interaction (HCI) software. The BCL Computers R&D team is continuously developing products that enhance our computer based document management systems. Areas of expertise also include neural networks, fuzzy logic, database technologies and natural language processing.

BCL Computers is partially sponsored by federal research contracts under the Small Business Innovation Research Program (SBIR) and the Advanced Technology Program (ATP). BCL Computers has received 8 SBIR contracts in the area of document and speech communication and one ATP contract in spoken language systems. We have over 12 patents issued and pending. Our proprietary document management technology now assists in commercializing digital library information for NASA*, NSF* and DARPA*. Years of steady progress and innovative breakthroughs backed by government-sponsored research have established BCL Computers as leaders in the document management industry.

BCL has been successfully working with companies to improve their workflow efficiency since 1994. The company's policy has always been not only to give an immediate solution to meet its clients' needs, but also to help companies grow in their respective fields.

Hey,
I thought I was
the only one who
could morph!

plugins for Adobe Acrobat

In today's fast-paced world, getting your message out means getting it out everywhere...in print as well as on-line. If you find yourself frustrated by the inefficiencies of publishing first for one medium then re-formatting for another, BCL Computers makes several content conversion tools for you. All designed as Adobe Acrobat plug-ins, **Jade 5.0**, **Drake 5.0**, **Freebird 5.0** and **Magellan 5.0** can help you make content publishing for multiple media a more efficient process....

Magellan 5.0®

Web Publishing Made Easy!

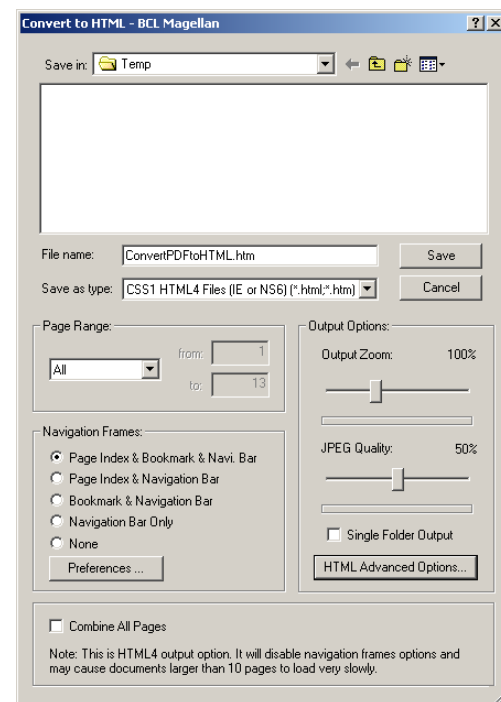

BCL's Magellan 5.0® plug-in for Adobe Acrobat® instantly converts your PDF files into HTML4 format for online browsing. Magellan 5.0® uses a unique process that preserves the original document layout - complete with graphics, lines, hyperlinks and bookmarks - while transforming it into a useable and searchable document for the web.

Key Features

- ✓ Uses Cascading Style Sheet (CSS) and Netscape® Layers to preserve your original page structure.
- ✓ Uses the reflow technology of HTML 3.2 to convert documents for display on HTML 3.2-compliant e-books and PDAs.
- ✓ Extracts Raster and Vector Graphics from your documents and accurately places them in the HTML output files, saving them as JPEG images.
- ✓ Accurately extracts and maps internal, external and multimedia (avi, wav) hyperlinks from your documents.
- ✓ Allows various zoom levels so that users can increase or decrease the output size if the document is too big to fit on the screen.
- ✓ Adds description and Keyword MetaTags to your file prior to the conversion process.
- ✓ Generates the Acrobat® style bookmark and page index navigation bar to aid in navigation.

System & Software Requirements:

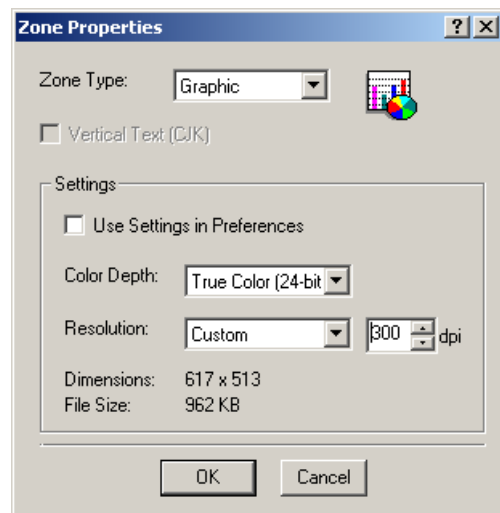

Windows 95/98/NT/2000/XP; Acrobat® 5.0 (not compatible with the free Acrobat Reader; earlier versions are available for Acrobat® 3 & 4); Netscape Navigator® 4.04 or Internet Explorer® 4.0 (CSS compatible).

Magellan 5.0's Easy to Use Interface
All of the options you need to convert your PDF document into HTML are located in this one convenient dialog box. It doesn't get any easier than this.

Jade 5.0's Zone-Type Selections

Specify blocks of information, or "zones" within your PDF file, and Jade 5.0 automatically detects the type of the data inside those zones, making it possible to extract any type of information.

Jade 5.0®

Extract PDF Content For Word Processor and Spreadsheet Programs!

Jade 5.0® is a plug-in for Adobe Acrobat® 5.0 and 5.0J that allows you to accurately extract data that would otherwise be unobtainable from PDF files. Using our unique "zoning" feature, Jade 5.0® allows you to extract text, tabular data, and graphics from these files so that you can edit the information in Windows applications such as Microsoft Word®, Excel®, and Adobe Photoshop®.

No more retyping text and tables! Simply specify which part of the page you want to extract. Then, drag and drop the zoned text, table or graphic directly into your spreadsheet or word processor file, or copy and paste it into your Windows Clipboard.

Key Features

- ✓ Uses graphic zones to create BMP files or clipboard images with any user-defined resolution and color depth. You can paste your results to any image-enabled authoring product with one intuitive drag-and-drop, copy-and-paste or export-to-file interface.
- ✓ Extracts Asian language text and tables from either horizontal or vertical layout originals.
- ✓ Performs high-quality, high-accuracy conversion with productivity enhancing functions. Using multiple zone extraction, implicit sequencing, font mapping, usage statistics and custom tagging of output, Jade® allows for flexible, *automated* export of the content in your document.
- ✓ Maintains character formatting by mapping fonts, font style, font size, text color and superscripts. Jade® also preserves your background and foreground colors while removing hidden and overstrike text.
- ✓ Detects paragraph breaks, removes hyphenation, inserts bullets, preserves margins, indentation, alignment and line spacing.

System & Software Requirements:

Windows 95/98/NT/2000/XP; Acrobat® 5.0, 5.0J, 4.0 or 4.0J (Japanese) (not compatible with the free Acrobat Reader; an earlier version is available for Acrobat® 3).

Freebird 5.0®

Export PDF Pages to TIFF/JPEG/BMP With Ease!

With BCL's Freebird 5.0® plug-in, you can accurately convert your documents into multiple graphic output formats: TIFF, JPEG, and BMP. Freebird 5.0® is an excellent tool for archiving data when you want to maintain the look and feel of your original document without losing graphic clarity or integrity. Freebird 5.0 supports output resolutions of up to 600 dpi, giving you high clarity output.

Key Features

- ✓ Converts PDF files to industry standard TIFF, JPEG or BMP formats.
- ✓ Converts your multiple-page PDF file to one large multiple-page file (TIFF only) or to multiple files (all formats).
- ✓ Supports color outputs (16-color, 256-color, TrueColor) and B&W output.
- ✓ Output resolution range of 100 to 600 dpi, enabling you to print complex technical drawings or flow charts in with high clarity. (Note: BMP and JPEG output file size is limited to 10 MB per file; no size limit for TIFF.)
- ✓ Supports user-defined compression methods for TIFF output, including Huffman's, Group 3, Group 4 and PackBits.

System & Software Requirements:

Windows 95/98/NT/2000/XP; Acrobat® 5.0 (not compatible with the free Acrobat Reader; earlier versions are available for Acrobat® 3 & 4). Multipage TIFF viewer (included in Windows® OS); free space on your hard drive for memory swapping; at least 8 MB of RAM.

Server Solutions

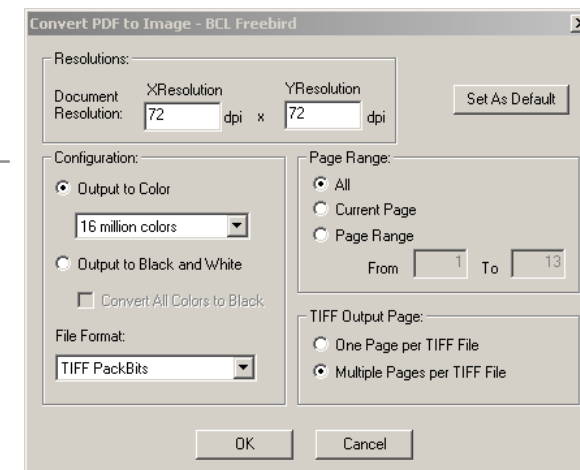

Whether you need to process multiple documents quickly and remotely, create watch folders, or access the API, we have a server solution for you. Contact us for more info.

Custom Solutions

Jade®, Magellan®, Drake®, and Freebird® are designed for users who do not have large scale document re-purposing needs. We would like to work with you in order to deliver a custom product that is tailored exactly as you need. We will develop document management solutions for you that integrate into your organization's workflow and increase productivity. For more information, please email sales@bcl-computers.com, or call 408-225-2679.

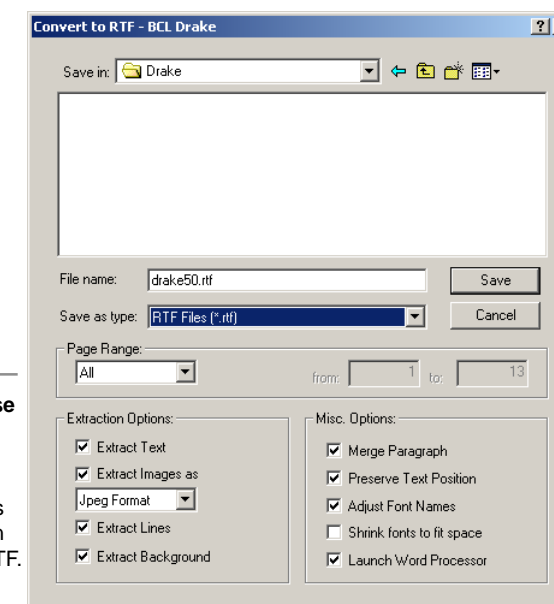

Freebird 5.0's Easy to Use Interface

You have full control over the output of your PDF documents. Freebird offers a wide variety of TIFF, B&W and color output. Freebird supports resolutions up to 600 dpi.

Drake 5.0's Easy to Use Interface

With this Magellan-like user interface, you can control all of the options necessary to convert an entire document into RTF.

Drake 5.0®

Convert PDF to RTF Automatically, Without Zoning!

Where Jade 5.0® allows extraction of key segments of your documents, BCL's Drake 5.0® automatically converts *whole* documents into editable RTF in one easy step. Drake® utilizes Microsoft Word® drawing features to preserve page structure so that the RTF output you generate will retain the original structure of your document.

Key Features

- ✓ Allows you to extract raster graphics and lines (horizontal and vertical) from your document and place them accurately in the RTF output file. Vector graphics are not supported.
- ✓ No more zoning! Converting your PDF files to RTF is as easy as printing out the pages in Acrobat®

System & Software Requirements: Windows 95/98/NT/2000/XP; Acrobat® 5.0 (not compatible with the free Acrobat Reader; earlier versions are available for Acrobat® 4); Microsoft Word®.
