

We have been successfully working with companies to improve their **workflow efficiency** since 1994. Our policy has always been not only to give an immediate solution to meet their needs, but also to help them grow in their respective fields

BCL Technologies leads the industry in providing the tools necessary for document management and web publishing. We specialize in developing software solutions that analyze, manipulate and use information that is stored in different file formats. We concentrate a large portion of our research and development efforts in text and speech based Human Computer Interaction (HCI) software. The BCL Technologies R&D team is continuously developing products that enhance our computer based document management systems. Areas of expertise also include neural networks, fuzzy logic, database technologies and natural language processing.

BCL Technologies is partially sponsored by federal research contracts under the Small Business Innovation Research Program (SBIR) and the Advanced Technology Program (ATP). BCL Technologies has received 8 SBIR contracts in the area of document and speech communication and one ATP contract in spoken language systems. We have over 12 patents issued and pending. Our proprietary document management technology now assists in commercializing digital library information for NASA*, NSF* and DARPA*. Years of steady progress and innovative breakthroughs backed by government-sponsored research have established BCL Technologies as leaders in the document management industry.

This research has lead to the development of several commercial products and services that have become vital to anyone who processes information. Most notably, our technology has been successfully integrated as a standard part of Adobe® Acrobat's® essential tools.** Descriptions of our products are given below, and success stories may be view on our web page.

Our **software solutions** streamline the document management process – automating it while maintaining the content, appearance and flow of the original documents. Our products range from archiving documents with industry standard TIFF to publishing in authentic HTML. Using our resources, anyone can create a PDF file, extract information to universal RTF or convert a document to any format. Combined with our server solutions, the power of these products becomes immeasurable. We offer a free online conversion service to showcase what some of our products are capable of. BCL Technologies also customizes these software solutions to address the specific document management needs of individual companies.

Conversion Software Products

- BCL easyPDF** Convert any document to PDF
- BCL Jade** Extract PDF elements (text, table, graphics)
- BCL Freebird** Convert PDF to Graphics
- BCL Magellan** Convert Documents to HTML
- BCL Drake** Convert PDF to RTF

note: COM Objects are available for these products

Server Solutions

- goBCL** Free online conversion service
- FileShare** Secure document repository
- WorkflowServers** Server-Side document conversion

*Defense Advanced Research Projects Agency (DARPA); National Aeronautic and Space Administration (NASA); National Science Foundation (NSF)
**BCL Technologies handles sales and marketing distribution in conjunction with various companies, including Adobe® Systems, Inc.
