

Instantly converts documents to HTML
Faithfully maintains the original document's formatting

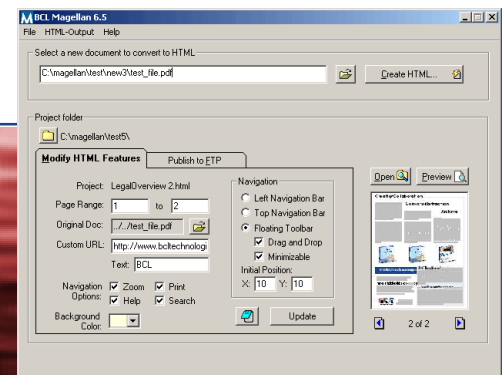

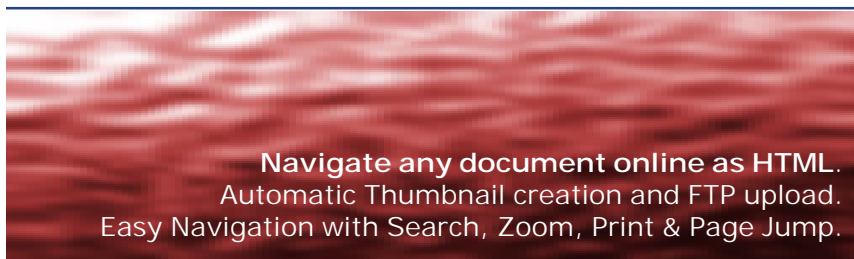

Key Benefits

- ➔ **Conversion Features:** Layered or Free-Flowing HTML, zoom & image quality slider, single folder output, hyperlink preservation, document preview & FTP Upload.
- ➔ **Navigation Features:** Bookmarks, Index bar with thumbnails, Search, Zoom, Print & Page Jump.
- ➔ **Best of Class:** Some applications do have an "export as HTML" feature, but their output is usually a low-quality HTML page that has lost all its page formatting. It doesn't include page navigation or any of the other features Magellan offers.
- ➔ **Free-Flow Option:** Magellan can format HTML so that it may be viewed on small devices such as PDAs or e-books.
- ➔ **Enterprise Level Server Solutions:** Magellan Workflow Server is available for batch HTML creation.

Overview

BCL Magellan can convert any file into HTML so that it can be accessed from any browser running on any operating system. Instead of forcing users to download your document for reading offline, make it web-ready with Magellan.

Quality Output: The HTML version of your document will look exactly like the original document. Magellan uses layers to position all the "pieces" of a document on your web page, guaranteeing that your text, tables, columns, and graphics will appear exactly the same.

Right-click any doc & select "Convert to HTML"

System Requirements

- * Windows ® 98 / ME / 2000 / XP
- * 10 MB free harddisk space
- * 32 MB memory
- * Internet Browser (e.g. Netscape 4.04+ or IE 4+)

Server & Custom Solutions

- * Magellan Workflow Server
- * Magellan SDK with COM Object

Support & Upgrades

- * Free for 30 days

About BCL Technologies

Since 1994, BCL Technologies has lead the industry in providing the tools necessary for document management and web publishing. We specialize in developing software solutions that analyze, manipulate and use information that is stored in different file formats. Our R&D team is continuously developing products that enhance our computer based document management systems.

Our software solutions streamline the document management process – automating it while maintaining the content, appearance and flow of the original

documents. Using our resources, anyone can create a PDF file, extract information to universal RTF or convert a document to any format. Combined with our server solutions, the power of these products becomes immeasurable.

All of our software may be customized to address the specific document management needs of individual companies.
